- (1) To augment table fish production to meet the demand of fish for solving the malnutrition of the masses in the State,
- (2) To conserve and develop the natural fisheries resources of the State,
- (3) To conserve and propagate economically important endangered fish species of the State,
- (4) To produce sufficient quantities of high yielding exotic as well as indigenous fish species for stocking the culturable water areas of the state
- (5) To survey the vast natural fisheries resources of the state for its relational exploitation
- (6) to create artificial, impoundments, ponds, tanks, reservoirs etc, for enhancement of fish production in the state through pisciculture
- (7) to introduce and culture of high yielding fish species in the state
- (8) to generate self employment through scientific fish culture in the rural people for upliftment of their socio- economic conditions
- (9) to study and introduce of new technologies for enhancement of fish production
- (10) to create trained manpower for implementation of various developmental schemes/ programmes of the department
- (11) to establish regional and district level fish seed farms and hatcheries in the state for production of quality high yielding fish seeds to cater the needs of the private fish farmers as well as establishment of experimental fish farms for production of table fishes
- (12) to impart training to fish farmers/fisher folks at the grass root levels on the latest technologies in fish and fisheries as well as to the educated un-employed youths of the state for self employment,
- (13) to conduct various fisheries extension programmes for awareness of the latest technologies to the fish farms / fishermen for augmenting fish production
- (14) to provide technical guidance as well as financial assistance from the financing institution such as Banks/NABARD/NEC etc for enabling the poor fish farmers for taking up aquaculture
- (15) to arrange for life insurance coverage of the fishermen in the state
- (16) to provide basic amenities for the welfare of the fishermen communities
- (17) to formulate and implement various fisheries developmental projects/schemes
- (18) to enforce Manipur Fisheries Act,1988 and Manipur Fishery Rules 1998 effectively

- (19) to publish fishery news bulletins, leaflets etc for awareness of the general public,
- (20) to replenish natural fish stock by releasing sufficient quantities in the large water bodies

2. MISSION/VISION:

The Department aims at development to fisheries in the state to augment table fish to meet the requirement of the state. The present level of fish production is to the tune of 18,000 MT (2005-2006) against the requirement of 25,000 MT, calculate as per the standard nutritional requirement of 11 kgs per capita consumption of fish for 23,34 lakhs population of the state as per Census 2001, the department aims at self sufficiency in fish production by the year 2011-12. to achieve the objective the Department is taking up 14 developmental plan schemes

- (1) strengthening of supervisory and Executive Staffs
- (2) inland Fisheries Development
- (3) fish Marketing, Craft and gear
- (4) assistance to pisciculturists
- (5) Establishment of FFDA's and other Centrally sponsored Schemes
- (6) Establishment of fish Aquarium and Museum
- (7) Development of pisciculture in 4 valley districts of Manipur especially in the peripheral areas of Loktak Lake
- (8) Conservation and Development of flood plain lakes in Manipur
- (9) Conservation of Declining indigenous Endangered fish species of the state
- (10) Production Propagation of Fresh Water Prawn and Other Prawns in Manipur
- (11) Setting up of Fish Disease Detection and Controlling Laboratory
- (12) Development of cold water fisheries in hill districts of Manipur
- (13) Establishment of fish farms in hill districts of Manipur
- (14) Development of reservoir fisheries

3. BRIEF HISTORY AND BACKGROUND FOR ITS ESTABLISHMENT:

The state department of fisheries Manipur started its functioning in the year 1959 as a wing of the then agriculture department Manipur under one chief fishery officer along with some skeletal staffs.

Thereafter, the Department started functioning as a Directorate since 1979. the status of the chief fishery officer was also upgraded to the Director of Fisheries Manipur. All the district level offices headed by one district fishery officer each along with both technical and administrative staffs were opened for effective implementation of various developmental plan schemes of the department.

4. ORGANISATION CHARTS:

For implementation of various developmental plan schemes / project suitable manpower management is a must both qualitatively as well as quantitatively. The

department is headed by a director who is the executive head of the department. He is assisted on the technical side by one additional director, one Joint director, one deputy Register Co-operative societies(fishery) along with 4(four) Fishery Officer ea for implementation of various developmental plan schemes. In administration, he is assisted by one District fishery officer assisted by a fishery officer along account officer. All the districts have on district fishery officer assisted by a fishery officer along with technical and administrative staffs. The department is also implementing fish farmers development agencies one each in each of the 9 districts (except Imphal east district) headed by one Chief Executive officer under the centrally sponsored scheme on development of fresh water aquaculture. The organization Charts of the Department are as enclosed annexure A, B and C.

5. ALLOCATION OF BUSINESS:

To popularize fish culture and enhancement of fish production in the state along with generation of self employment avenues to the fish farmers and unemployed youths for upliftment of their socio-economic conditions.

6. DUTIES TO BE PERFORMED TO ACHIEVE THE MISSION:

- (1) Enhancing production of table fish from 18,000 MT to 25,000 MT during the period of 2006-2011,
- (2) Development of naturally available fisheries resources for more productivity and generating more self employment and higher income in fisheries sector,
- (3) Special focus will be n hybridization and development. The accelerated programmes for breeders particularly hybrid seed production of improved varieties to be intensified advancement of bio technology as a powerful tool has open a new vistas in breaking genetic barriers and hence gene- transfer across the boarder is now possible,
- (4) Management and action plan for development of divested fisheries in the state
- (5) Setting up of fish disease detection cell with laboratory for identification and monitoring of outbreak and control of fish diseases to cater the seeds of the farmers in close association with research institution of Manipur central university, central Agriculture University and Indian council of Agriculture Research NEH Region Manipur etc.,
- (6) To accelerate production of fish in the state by adopting latest scientific fish culture through extension programmes under the state as well as central sponsored schemes,
- (7) Strengthening of survey, extension and training infrastructure in the state
- (8) Development of inland capture fisheries b adopting culture based fisheries and fishing will be done strictly in accordance with the Manipur fisheries Rules, 1998 to control fisheries of the state,
- (9) To resource based capture fisheries in the state are riverine canal and reservoir fisheries. The main problems in this sector are related to (i) un-regulated fishing and lack of conservation measures and (ii) lack of sufficient breeding, hatching facilities, coal water fisheries etc.,
- (10) The thrust should be sustainable use of natural resources such as land and water in such a way it solve to the objective accelerated growth of employment malnutrition and is also ecologically sustainable,

- (11) Conservation and development of existing water areas should form one of the topmost priorities for fisheries schemes since continuous fresh silt deposition and phoomdies in these natural lakes/beels every year jeopardized the existence of these natural water areas and there is every possibilities that the whole natural fishery resources will become dry within a short period of time to come with the reason that these will adversely disturb ecological balance,
- (12) Main thrust will be on diversification of aquaculture towards intensive culture through creating of relevant infrastructure like construction of 1.0 hac. unit ponds etc.,
- (13) The basic aim at various developmental programmes in the state will be to enable the fish farmers to take up pisciculture through adoption of the latest techniques of fish culture and its arrangement aspects,
- (14) The main thrust also center around extension services along with setting up of fish farms and establishment of prawn seed hatcheries etc. to cater the needs of fish seed and prawn seed to the fish farmers. The state Government's role is in the development of prawn farming and its future plan of action for sustainable prawn farming,
- (15) The main objective of fisheries development in the State are to increase productively of fish from freshwater resources through intensive/composite/ mixed farming in small and medium water bodies and culture-based capture fisheries in the larger water bodies.
- (16) The other objectives of fisheries development in the State are to generate self-employment to the educated un-employment youths by taking up fish culture/farming and engaging them in fishing industries and fish culture in their own holding for which schemes like excavation of ponds/tanks, running water fish culture, integrated fish farming and agriculture etc. will be taken up under Centrally Sponsored Schemes during the coming Five Years plans.
- (17) Fisheries research, education and extension from some of the critical inputs for accelerating growth of fish production. Special focus will be on hybridization, development and accelerated programmes for brooders, seed production particularly hybrid of improved varieties.
- (18) Research on bio-technology for possibilities on hybridization of local indigenous fishes with other quick growing exotic fishes to find out suitable hybrid, diseases-resistant parent species for more production will have to be taken up in the State.
- (19) On technology aspects, organization of induced breeding programmes, mini kit demonstration and technology transfer mechanism will be intensified.
- (20) To study the declining trend of some economically important fishes like **Tort or, Tor putitora, Labeo bata (Ngaton), Schizothorax richardsonii (Sananga) etc.** and remedial measures to be taken up to conserve these fish species. These indigenous endangered rare species need to be protected and conserved.
- (21) To conduct investigations for proper appraisal for all inland fisheries resources of the State and to evolve suitable methods for their conservation and optimum utilization.

- (22) To investigate cause, effects and remedies for degradation and pollution of the available natural fisheries resources and provide research support for litigation and conservation of such resources.
- (23) To study and evolve strategies for development on the impact of the riverine fisheries, river ranching projects.
- (24) To enforce and implementation of the Manipur Fisheries Act, 1988 and Manipur Fisheries Rules, 1998 with which proper control and development programmes of the natural fisheries resources of the State will be possible for their maximum rational exploitation.
- (25) Most of the natural fisheries resources available in the State are owned by the Revenue Department, Manipur. There are 113 nos. of such natural fisheries under the State Revenue Department. This is one the main hurdle in fisheries development programmes as the State Revenue Department has no any such development programmes. Out of these. Only 28 nos. pf Govt. fisheries covering 1,380,82 ha were divested and transferred to the State Fisheries Department, Manipur and these water areas have been leased out to the pisciculture co-operative societies on long term lease basis for taking up pisciculture programmes. However, development of these fisheries could not be taken up due to inadequacy of State plan funds or lack of financing institutions in the state. If sufficient fund is available or assured either from NABARD through a workable banking plan on NCDC or non-lapsable pool resources of the Govt. of India etc., fish production in the State could be boost up tremendously not only for achieving self-sufficient but also for exporting to the neighboring states.
